Functions and recursion

Project 2 due Mon Sep 16 11:59 pm

Function calls

RA
↓
caller-saved regs : a0-a7, t0-t6, ra
callee-saved regs : s0-s11, sp

```
foo:  
addi sp, sp, -16  
sd ra, (sp)  
# save s regs on stack  
:  
# save caller-saved regs
```

```
PC → call bar  
RA = PC + 4 # restore caller-saved regs  
:  
:
```

```
# restore s regs stack  
ld ra, (sp)  
addi sp, sp, 16  
ret
```

PC = RA
(main)

More complicated if/then statement

```
int is_in_range (int x, int a, int b) {
```

```
    if (x >= a && x <= b) {
```

```
        return 1;
```

```
    } else {
```

```
        return 0;
```

```
    }
```

```
}
```
